

Adhoc-Release

TubeSolar AG: TubeSolar GmbH is merged with TubeSolar AG

Augsburg, 25 June 2020 - The Managing Board and the Supervisory Board of TubeSolar AG, an innovative manufacturer of robust thin-film tubes for solar energy production, today decided to simplify the company structure and merge the wholly owned subsidiary TubeSolar GmbH into TubeSolar AG.

About TubeSolar AG

As a spin-off, TubeSolar AG has taken over the laboratory production including patents from OSRAM/LEDVANCE in Augsburg and has been using this patented technology since 2019 to manufacture photovoltaic thin-film tubes that are assembled into modules. These have considerable advantages over silicon solar modules in terms of weight, geometry, material use, yield, long-term stability and recycling. The technology is to be used primarily in the agricultural sector and will span agricultural production areas. In the next few years, it is planned to expand production in Augsburg to an annual production capacity of 250 MW.
